in LinkedIn ○ Github 🌐 Portfolio

Summary

Recent B.E. Cyber Security graduate with a strong foundation in network security, web application security, and cloud security, VAPT and SOC fundamentals. Skilled in Python, C++, Linux, and security tools such as Wireshark, Nmap, and OWASP ZAP. Hands-on experience building cybersecurity projects.

Projects

PhishGuard: AI-Powered Phishing Detection System

Nov 2025 - Jan 2026

Python, Django, ReactJS, XGBoost, Phishtank API, Google Safe Browsing API, urlscan.io

- Developed an AI-powered phishing detection system to identify malicious URLs using machine learning and threat intelligence APIs.
- Integrated XGBoost with Google Safe Browsing and urlscan.io for real-time URL analysis.

Hyperion: AI-Ready Blockchain-Powered Crypto Wallet for Trading & Risk Hedging

TypeScript, Python, Blockchain, JavaScript, Aiken, Shell

Hackathon Project

- Developed a prototype crypto wallet featuring secure digital asset management and AI-assisted trading.
- Designed a blockchain-based rewards system with trading milestones and user activity streak incentives.
- Proposed decentralized risk hedging and insurance mechanisms to improve asset security and user trust.

CivicBridge AI: AI-Powered Citizen Service Platform

Hackathon Project

Python, FastAPI, AWS Bedrock, AWS Lambda, DynamoDB, SQLite, JavaScript, JWT, RAG

- Developed an AI-powered civic platform that simplifies government schemes using multilingual policy translation, eligibility checking, and application tracking.
- Integrated Amazon Bedrock with (RAG) to provide contextual policy and AI-assisted citizen support.
- Implemented Zero-Trust security using JWT authentication, RBAC, AES-256 encryption, and secure offline synchronization for reliable access.

Distributed Firewall in Virtual Data-Center

Mar 2023 - May 2023

VMware Workstation, ESXi 7.0, pfSense Firewall

- Implemented a distributed firewall providing network security within a virtualized environment.
- Enabled granular control over network traffic at the hypervisor level.

Technical Skills

Languages: C, JavaScript, Python, C++

Tools/Frameworks: Nmap, Wireshark, Nessus, Burpsuite, OWASP ZAP, PCI-DSS, NIST

Others: Github, RHCSA, AWS, GCP, Azure, OWASP Juice Shop.

Education

RNS Institute Of Technology (RNSIT)

2026

Bachelor of Engineering in CSE (Cyber-Security)

CGPA: 8

Sri Krishna Polytechnic

2023

Computer Science and Engineering

CGPA: 9%

Certifications

- RHCSA - Red Hat Linux

- Google Cloud Cybersecurity Certificate - GCP

- Gen AI Academy - H2S

- Practical Cyber-Security for Cyber-Security Practitioners - NPTEL
